JavaScript React.js
PHP Redux
HTML / CSS Vue.js

Projects

Cards Against Humanity Game

An online clone of the popular game Cards Against Humanity. This application implements Socket.io to communicate commands from the server to the React / Redux front-end.

Team Hex

Team Hex is a sports team management app which implements a back-end RESTful api service and a React / Redux front-end.

Custom Start Page

This is a custom “new tab” page which handles saving and loading of bookmarked links as well as a search functionality using vanilla JavaScript.

Icewave

Icewave is a PHP routing library created out of curiosity. This project allows developers to create URL routes within their project.
